

Hancock Street Park Report 2024

Bev Yates

At Hancock Street Park, our work is mainly maintenance and slowly and surely we are reducing the weed seed bank. Madeira Vine is still of some concern and we have had the help of Mike McGoldrick to help us tackle this. As we clear the weeds, native plants continue to emerge and the forest is becoming quite dense where once it was much more sparse.

We believe that with the planting of the adjacent Micro Forest, there has been an increase in the fauna in the area.

Shirley and I are grateful for the people who work with us - Peter, Judi, Max and Anna (our most recent volunteer). A special mention should be made of Coral who has worked with us for many years and whom we are really going to miss.
